What's up with hard hat safety!

OSHA requires the use of ANSI-compliant head protection to help prevent serious injuries.

ANSI Z89.1-2009

Industrial head protective helmets meeting the requirements of the 2009 standard are classified as:

Type I: Protects against hits to the top of the head.

Type II: Protects against hits to the top and lateral sides to the head.

The three classes indicate the helmets electrical insulation rating.

Class E (electrical) tested to withstand 20,000 volts.

Class G (general) tested to withstand 2200 volts.

Class C (conductive) provide no electrical protection.

HARD HAT SUSPENSIONS

KNOW THE DIFFERENCE!

Pin Lock Suspension

Adjust by inserting pin into corresponding hole

Ratchet Suspension

Adjust by turning a knob in the rear of the hard hat

Swingstrap Suspension

Adjust by squeezing separating suspension to best fit

Suspensions are available in 4, 6 and 8 points.
The more points, the better the distribution of impact.

E2 Thermoplastic Hard Hats

- 8 pt. ratchet
- Smooth crown design
- Meets ANSI Z89.1-2009 Type 1, Class E

FIBE2RWYW – YELLOW
FIBE2RWWE – WHITE
FIBE2RWPK – PINK
FIBE2RWBE – BLUE
FIBE2RWRD – RED

Roughneck P2 Hard Hat

- 8 pt. ratchet
- Meets ANSI Z89.1-2009 CSA Z94.1-2005 Type 1, Class G

FIBP2NRW11A000 – BLACK
FIBP2NRW04A000 – ORANGE
FIBP2NRW12A000 – BROWN
FIBP2NRW09A000 – GRAY

E2 Cap Style Hard Hat

- Ratchet headband
- 8 pt. suspension
- Quick lok blocks
- Meets ANSI Z89.1-2009 Type 1, Class E

FIBE2QRW

E2 Flag Hard Hat

- Swingstrap
- 360° padded sweatband
- Meets ANSI Z89.1-2009 Type 1, Class E

FIBE2SWWELAG

FMX Hard Hats

- Colorful designs that won't chip, fade nor peel
- Smooth thermoplastic crown deflects impacting objects
- 8 pt. suspension disperses impact energy
- Meets ANSI Z89.1-2009 Type 1, Class E

Flames

FIBE2RWX1

Demon

FIBE2RWX2

Burner

FIBE2RWX3

E1 Full Brim Thermoplastic Hard Hats

- 8 pt. ratchet
- Meets ANSI Z89.1-2009 Type 1, Class E

FIBE1RW02A000 – YELLOW
FIBE1RWWE – WHITE
FIBE1RWSGOE – ORANGE
FIBE1RW71A000 – BLUE
FIBE1RW15A000 – RED

Spirit of America Hard Hats

- Overlay design that's heat and scratch resistant
- Meets ANSI Z89.1-2009 Type 1, Class E

Full Brim
FIBE1RW00A006

FIBE2RW00A006

Thermo Plastic Welding Helmets

- Light weight and full size
- Lifetime warranty on helmet and headgear

Flame

FIB2999BV913X1

Wire Burner

FIB2999BV913X3

PERSONAL PROTECTION- HEAD

Skull Guard Hard Hats

- Consists of a polyethylene shell and suspension system

Tan Fiber Cap

HARDHATFIBER

Tan Fiber Full Brim

HARDHATFIBERFB

White Fiber Full Brim

HARDHATFIBERFB-W

Compliance Kit

- Includes: Hard hat, ear plugs, leather gloves & safety glasses
- Universal size
- Kit designed for tradespeople

NORBASICITA29WHT

Peak Hard Hats

- 4 pt. pin lock nylon suspension
- A29: Meets ANSI Z89.1-2009 Type 1, Class E
- A79: Meets ANSI Z89.1-2009 Type 1, Class, CSA Z94.1-2005 Type 1, Class E

NORA79 - YELLOW
NORA79 - BLUE
NORA79 - WHITE
NORA79 - RED
NORA2944 - LIME GREEN

Vented Ridgeline Premium Hard Hats

- 4 pt. position harness points
- Rear padded suspension, vented pressure pad
- Swing hinge points

PYRHP44110V - WHITE
PYRHP44112V - GRAY
PYRHP44141V - HI-VIS ORANGE
PYRHP44131V - HI-VIS GREEN

Hi-Vis Cap Cover

FIBEFMHVCCSGOE

Sun Shroud

- Size 12" x 14"

FIBFMSS20E

Neck Guards

- Elastic bands to fit over most hard hats

ERB19281 - HI-VIS LIME
ERB19282 - ORANGE

Terry Sweatband for Hard Hats

- Fits most hard hat suspension systems
- Machine washable

ERG6609

Hard Hat Sweat Band

- Air cushioned
- Will not slip

FIBFM22R

Hard Hat Sunshield

- Use with full brim hard hat
- Blocks 99.9 of UV

FIBFMPSB1

High Performance Face Shield Headgear

- Provides 40% more protective area than standard faceshields
- Meets ANSI Z87.1, CSA Z94.3 standards

FIBF400

High Performance Face Shield Hard Hat Adapter

- Hard hat and full brim
- Dielectric bracket

FIBFM70— Standard
FIBFM71— Full Brim

Protecto-Shield

- Tough thermoplastic for superior heat protection

HONEY11340143

Face Shield Replacement

- Wide vision
- Clear, wide View 8" x 16 1/2"
- Meets ANSI Z87.1, CSA Z94.3

FIB4178CL

Mesh Face Shield

- Epoxy coated steel for glare

ERB15157

M3 Cap Mounted Earmuff

- NRR 24
- Slots easily into most hard hats
- Can be locked into standby position for storage

MOLDEX6300

LIGHT TRANSMISSION GRAPHS

Anti-Reflective

Light silver mirror coating provides just enough reflection of light for indoor and outdoor conditions.

65% of the total amount of light passes through this **ANTI-REFLECTIVE** lens

Yellow

Enhances available light for low light conditions or after dusk driving.

80% of the total amount of light passes through this **YELLOW** lens

Copper

Filters out Blue Light or haze which can cause eye fatigue, tired, strained, or sore eyes. Specifically engineered as a high contrast driving lens to give you greater depth perception.

8% of the total amount of light passes through this **COPPER** Driving lens

Smoke

The perfect all-around tint for standard shading in normal light conditions.

16% of the total amount of light passes through this **SMOKE** lens

Silver Mirror

Similar to Smoke lens properties, but has the added Silver Mirror lens coating which reflects more light, making it ideal for bright light conditions.

13% of the total amount of light passes through this **SILVER MIRROR** lens

Aqua Precision Red

The Aqua-based color of this lens maximizes clarity and contrast. The technology in this lens was originally designed by NASA as a reflective coating for satellite portholes.

13% of the total amount of light passes through this **AQUA PRECISION RED** lens

Polarized Copper

Filters out Blue Light or haze which can cause eye fatigue, tired, strained, or sore eyes. Specifically engineered as a high contrast driving lens to give you greater depth perception, and also offers the added feature of a polarized lens as described on page 7 under "Light Management."

8% of the total amount of light passes through this **POLARIZED COPPER** Driving lens

Polarized Aqua Precision Blue

The Aqua-based color of this lens maximizes clarity and contrast. The technology in this lens was designed by NASA as a reflective coating for satellite portholes, and also offers the added feature of a polarized lens as described on page 7 under "Light Management."

10% of the total amount of light passes through this **POLARIZED AQUA PRECISION BLUE** lens

Aqua Precision Lens

Exposure to high levels of light without proper sunglass lens filtration may cause

Honeywell

PERSONAL PROTECTION- HEARING

Hear today gone tomorrow - use your hearing protection

Sound level taken from ANSI/ASSE A10.46.2007; The Occupational Environment - Its Evaluation, Control and Management, 2nd Edition, AIHA, 2003; and Noise and Hearing Loss in the Construction Industry, School of Public Health and Community Medicine, University of Washington, 2004.

USE THE 2-3 FOOT RULE

When a sound level meter is not available, you should use the 2 to 3 foot rule: Stand about an arm's length away from your coworker: If you have to raise your voice to be heard 2-3 feet away, you should assume that the sound level is at or above 85 dBA.

Z2 Economy Earmuff

- NRR 25, over the head
- Multi-position headband
- Molded grips for easy fitting

MOLDEX6201

MOLDEX

MX-5 Earmuff

- NRR 27, overmolded & cushion-ribbed headband is durable and comfortable
- Larger ear cushions, fits almost all ears comfortably

MOLDEX6120MX5

Rockets® Earplugs

- Easy grip handle
- Reusable & washable
- Soft, flexible flanges for superior seal
- NRR 27 dB

MOLDEX6400 Uncorded 50/box
MOLDEX6405 Corded 50/box

PERSONAL PROTECTION- RESPIRATORY

More Surface, More Comfort

Easier breathing and cool comfort are what you get when you wear an AirWave respirator. The larger surface area of the patent-pending wave design means more air flows in and out of the mask all without a valve! Easy breathing... by design.

More Air. More Wear.™

More Flex, More Durability

The unique FlexFit design moves with your mouth for comfort all day long. More comfort means AirWave is a mask that your workers will want to wear, and that means more compliance. Plus the Dura-Mesh shell prevents collapsing from heat and humidity so your mask last longer.

More Air, More Wear

When you can breath easier and you're more comfortable, you'll want to keep wearing AirWave! Longer wear means less masks, less masks means more savings. Compliance and cost savings just got easier.

Airwave N95 Particulate Mask with SmartStrap

- Exclusive easy-breathing wave design
- SmartStrap® - Hangable and adjustable
- Metal free, 10 per box

MOLDEX4600

MOLDEX

N95 Particulate Mask

- Dura-Mesh shell upholds in heat and humidity
- No metal nose band
- 20 per box

MOLDEX2200N95

MOLDEX

NIOSH - Approved Protection Categories

Filter Type

N - Class particulate respirators are approved for solid and liquid particulates, excluding oils.

R - Class is for both oil and non-oil solid and liquid particulates, with a maximum 8-hour or one shift use restriction when used for oil mist.

P - Class respirators are approved for both oil and non-oil particulates and have no time use restriction.

Filter Efficiency Level

95 = 95% minimum filter efficiency in removing particulates.

99 = 99% minimum filter efficiency in removing particulates.

100 = 99.97% minimum filter efficiency in removing particulates.

N95 High Visibility Particulate Mask

- Dura-Mesh shell upholds in heat and humidity
- 20 per box

MOLDEX2200N95HV

MOLDEX

MOLDEX

7000 Series Half Mask Respirator

- Sleek design for modern, high-tech look and increased worker acceptance
- Light weight design plus extra-wide sealing area provides all-day comfort
- Mask drops down for convenient storage around the neck or locks down for custom fit

Contoured neck buckles for comfort and quick attachment

Adjustable head harness for a custom fit

Wide flange fits more facial shapes comfortably

Low profile, angled cartridge placement

Easy mount bayonet cartridge/filter attachment

Attached exhale cover for easy inspection

MOLDEX7000

MOLDEX

9000 Series Full Face Respirator

- Streamlined and ultra-light weight increases worker comfort and compliance
- Over-molded lens design for greater field of vision, less weight, fewer parts, less maintenance

Over molded buckles for secure strap attachment. One finger strap release

Lightest weight facepiece of any popular model.

Weights less than 12.7 oz.

Stand away head harness for easy donning

Completely free of metal parts

Lens with scratch resistant coating meets ANSI Z87 + for impact protection

Panoramic lens with peripheral vision side panels

Easy mount bayonet cartridge/filter attachment

Attached exhale cover for easy inspection

MOLDEX9000

ERG8911-L
ERG8911

ANSI Classes

ANSI 107-2010 - Provide practical instruction regarding both reflective material and garment design. These guidelines also define classes of garments as most appropriate, depending on the level of risk in the work environment:

ANSI CLASS 1 - For workers who are well separated from traffic and working in areas where vehicle and/or equipment speeds do not exceed 25 mph. This class includes those directing parking operations, retrieving shopping carts from parking areas, maintaining sidewalks, making deliveries from vehicles, and working in warehouses where motorized equipment is present.

ANSI CLASS 2 - For workers in situations where complex visual backgrounds may be present. This class includes roadway construction workers, utility workers, survey crews, crossing guards, tollgate personnel, airport baggage handlers, first responders and law enforcement personnel.

ANSI CLASS 3 - High visibility garments for workers in the highest-risk situations, who need to be visible through a full range of body motions from a minimum distance of 1280 feet. This class includes highway maintenance and construction crews, utility workers, tow truck operators, survey crews, flaggers and emergency response personnel.

ANSI CLASS E - Applies to retroreflective equipped pants or shorts, designed to be worn in combination with either Class 2 or Class 3 tops. When worn in this manner, the ensemble is rated as Performance Class 3.

Back Support Hi-Visible

- 8" stretch bias with adjustable, detachable suspenders
- Sizes M-L-XL-2XL

ERG100HV

Class 2 T-Shirt

- Lightweight birdseye knit and wicking treatment

TYPES OF HARNESSES

MULTI-PURPOSE HARNESS

This type typically includes extra attachment points which allow work in a variety of situations. The belt and pad provide additional back lumbar support, positioning rings and tool carrying options.

WORK POSITIONING HARNESS

These harnesses have positioning D-rings located on the hips for use with pole straps or work positioning lanyards, which allow hands-free operation. Harnesses of this kind may include integral waist belts.

LADDER CLIMBING HARNESS

Harnesses with a frontal attachment point, for connection to permanent ladder safety systems.

DESCENT CONTROL HARNESS

These harnesses typically have frontal attachment points for use with descent control devices.

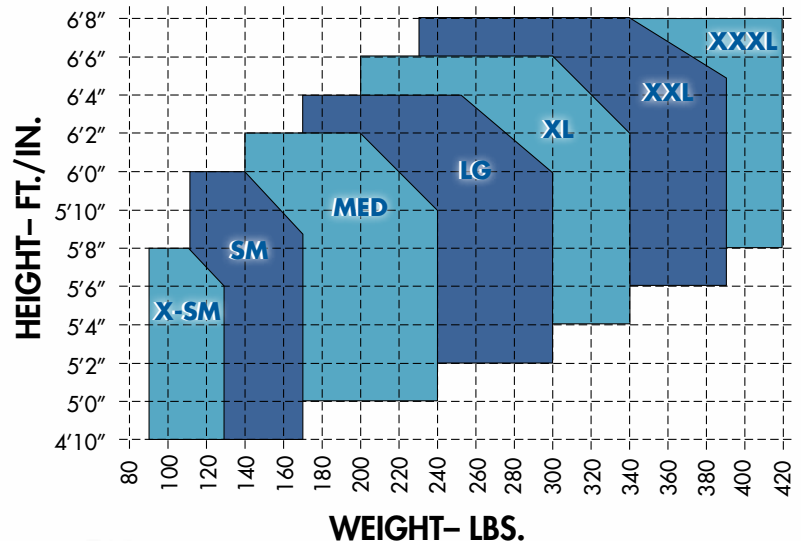

CONFINED/RETRIEVAL HARNESS

One attachment point located on each shoulder strap facilitates upright retrieval from confined spaces.

"CHOOSING" THE RIGHT HARNESS MADE EASY!

Concrete Anchor Point

- "Ace" concrete anchor point
- Ideal for permanent use
- Fall resistant/ positioning usage
- Easy to install and inexpensive

GUARD15040

Concrete Anchor Point

- Anchor bracket with integral D-ring
- Universal bushing
- Large washer

GUARD7451AC

TYPES OF ANCHORS

The choice of anchor depends on the type of work. Anchorages are defined by what they connect to (general/all purpose, steel, concrete, roof or specialty), whether they are fixed or mobile, and whether they are permanent or portable. They all must provide a secure point of attachment for a complete personal fall arrest system, and must be capable of supporting a load of 5,000 lbs. or meeting OSHA's criteria of a 2-to-1 safety factor.

Toggle Anchor

- Swiveling D-ring provides a compatible tie off point

DBI2100101

Concrete D-Ring Anchor

- Reusable for temporary or permanent applications

DBI2104560

Concrete D-Ring Anchor

- Reusable

DBI2190055

Concrete Wedge Anchor

- Exclusive quick release button for fast removal

DBI2100085

Concrete Wedge Anchor

- Portable, anchor for vertical wall or overhead ceiling

DBI2190053

Concrete Swivel Anchor

- Correct installation indicator
- Rotates increasing mobility
- Temp/permanent applications

GUARD00242

Fixed Beam Anchor

- Fits up to 1-1/2" thick beam flange, 2-1/2" to 12" wide

DBI2108406

Glyder™ Sliding Beam Anchor

- Dual beam grip adjustment fits 3-1/2" -14" wide flange up to 1-1/4" thickness

DBI2104700

Parapet Anchor

- Temporary fall arrest anchorage
- No fasteners required
- Fits Parapet Walls 1/2" to 15" thick

FALL7460A

Adjustable Skyhook

- Fits from flat -12/12" roof pitch
- Easy attachment and movement
- 360° swivel D-ring
- Weatherproof

GUARD00342

Portable Roof Anchor

- Reusable on flat or sloped wood roofs

DBI2103673

Permanent Roof Anchor

- Shingle over leaving only D-ring exposed

DBIAJ730A

Permanent Ridge-It Anchor

- Easy to install, exposing 2 D-rings for attachment
- Permanent on wood roof top
- Water tight protection

GUARD00511

Portable Roof Anchor

- Compact design, reusable on flat or sloped wood roofs

DBI2103677

EcoAnchor Roof Anchor

- 4' x 4' water filled counter-weight anchor with duffle bag

Order winch and SRL separately

ADVANCED HOIST SYSTEMS

These units are constructed of lightweight materials including high-strength aluminum. The davit pivots for ease-of-rescue and has adjustment for overhead clearance restrictions. The lower base adjusts to fit most standard entries.

Advanced 5 Piece Hoist System

- Davit arm base system is 11-1/2" to 27-1/2"
- Adjustable offset upper mast, 33" lightweight lower mast and 3-piece lightweight base.
- Includes: winch mounting bracket
- Weight: 100 lbs.

RSQ™ Dual – Mode Built in Rescue Operation

- 2 modes of operation, fall arrest mode, automatic descent mode

DBI3400930

Rescue Ladder

- Available in 8ft. Sections
- Includes 3 carabiners for attachment

DBI8516294

Perimeter Limiter Leading Edge Anchor

- Large foam filled trailer tire won't go flat and will provide easy movement
- Rotating 7.5 ft. mast and anchorage arm for added freedom of movement
- Pre-drilled holes for accessory rescue winches or jobsite boxes
- Additional weights and taller mast can be added for jobsite flexibility

DBI2100090

Freestanding, non penetrating anchor is ideal for concrete decking construction and provides overhead anchorages for up to 2 users

Construction Safety Netting

- Fire retardant debris netting
- Polyethylene
- UV resistant

Functions as a guardrail system while blocking materials from falling

48" Available in Black and Blue

GUARD70001-48"
GUARD70004-60"
GUARD70005-66"

FALL PROTECTION- GUARDRAIL SYSTEMS

California Code of Regulations
Title 8. Section §3209.
Standard Guardrails

Subchapter 7. General Industry Safety Orders
Group 1. General Physical Conditions and Structures Orders
Article 2. Standard Specifications

Wherever guardrail protection is required, the following standards shall be adhered to except that other types and arrangements of guardrail construction will be acceptable where the height, surface and end projection of the top rail complies with the standard specifications and the closure of the vertical area between the top rail and floor, platform, runway, or ramp provides protection at least equivalent to that afforded by a mid-rail.

(a) A standard guardrail shall consist of top rail, mid rail or equivalent protection, and posts, and shall have a vertical height within the range of 42 inches to 45 inches from the upper surface of the top rail to the floor, platform, runway, or ramp level. (Note: the permissible tolerance on height dimensions is one inch). The top rail shall be smooth-surfaced throughout the length of the railing. The mid rail shall be approximately halfway between the top rail and the floor, platform, runway, or ramp. The ends of the rails shall not overhang the terminal posts, except where such overhang does not constitute a projection hazard. (Title 24, Part 2, Section 2-1716(a)).

Note: Local building regulations may require 9-inch spacing of mid rails.

(b) All guardrails and other permissible types, including their connections and anchorage, shall be designed for a live load of 20 pounds per linear foot applied either horizontally or vertically downward at the top rail. Dimensional details of railing members of a few types of construction which comply with this strength requirement are given hereinafter in subsection (c).

Note: It is recognized that the minimum value of railing strength here specified is inadequate for safety under operating conditions where railings are liable to receive heavy stresses from crowds, trucking, handling materials, etc. For such conditions, additional strength shall be provided by use of heavier stock, closer spacing of posts, bracing, or otherwise.

Railing members shall be framed in such a position that they will afford the greatest support and protection, for example, top rails of structural steel angles shall have the outside face of vertical leg located on the side adjacent to the side of normal contact by the employee. (Title 24, Part 2, Section 2-1716(b).)

(c) The following are some acceptable guardrail specifications: other combinations will be accepted as long as equivalent strength and protection are maintained.

(1) In wooden construction, the posts to be of at least 2-inch by 4-inch nominal material spaced not to exceed 6 feet, the top rails to be smooth with corners rounded and not less than 2-inch by 4-inch nominal material. The posts may be spaced on 8-foot centers if the top rails consist of double 1-inch by 4-inch nominal boards, provided that 1 board is fastened in a flat position on top of the posts and the other is fastened in an edge-up position to the inside of the posts and the side of the top board. Single mid rails, where permitted, shall be not less than 2-inch by 4-inch nominal material and installed on the contact side of the guardrail.

(2) If constructed of standard metal pipe, the top rails and single mid rail, where permitted, to be 1 1/2-inch outside diameter or larger. The posts to be 1 1/2-inch outside diameter or larger, the spacing not to exceed 8 feet.

(3) Guardrails installed on or before May 26, 2011. If constructed of structural metal, the top rails to be angle iron of at least 2-inch by 2-inch by 1/4-inch angles or other metal shapes of equivalent bending strength; and the single mid rail, where permitted, to be iron or steel of at least 2-inch by 2-inch by 1/4-inch angles or other metal shapes of equivalent strength. The posts to be angle iron of at least 2-inch by 2-inch by 1/4-inch stock, the spacing not to exceed 8 feet.

(4) Guardrails installed after May 26, 2011. If constructed of structural metal, the top rails to be angle iron of at least 2-inch by 2-inch by 3/8-inch angles or other metal shapes of equivalent bending strength; and the single mid rail, where permitted, to be iron or steel of at least 2-inch by 2-inch by 3/8-inch angles or other metal shapes of equivalent strength. The posts to be angle iron of at least 2-inch by 2-inch by 3/8-inch stock, the spacing not to exceed 8 feet.

(d) Where toe boards are required, they shall be constructed of wood, concrete, metal, or other suitable material. Where constructed of metal grille, mesh shall not exceed 1-inch. The top of the toe board shall be not less than 3 1/2 inches above the platform, walkway, or other working level and the bottom clearance shall not exceed 1/4-inch.

Note: Where materials are piled, higher toe boards, or paneling from floor to intermediate rails or top rail shall be provided where necessary for safety. (Title 24, Part 2, Section 2-1753.)

Note: Authority cited: Section 142.3, Labor Code. Reference: Section 142.3, Labor Code; and Section 18943(c), Health and Safety Code.

FALL PROTECTION- GUARDRAIL SYSTEMS

Safety Boot® Guardrail System

JOBSITE SAFETY- ATMOSPHERE CONTROL

TESTING THE ATMOSPHERE

Never assume that the air inside any confined space will support human life until it has been tested. Always determine the oxygen level in the confined space before allowing personnel to enter. It may save a life or eliminate the chance of an explosion.

IMPORTANT THINGS TO REMEMBER

The chemistry of a gas or vapor determines its weight. Gases heavier than air will settle to the bottom area inside a confined work space. Gases lighter than air will be found around the top area inside a confined workspace. Because gases at any level can be dangerous, it is necessary to test all area (top, middle and bottom) of a confined work space with properly calibrated testing instruments to determine exactly what types of gases are present and their relative concentration levels. If testing reveals an atmosphere that is oxygen deficient/enriched, contains a gas or a mixture of gases classified as hazardous, or the presence of toxic gases or vapors, the confined work space must first be ventilated with proper type of air ventilation blower and then retested as necessary before workers are allowed to enter.

THE BOTTOM LINE:

Never trust your senses to determine if the atmosphere inside a confined work space is safe! You can not see or smell many toxic gases or vapors. You can not determine the oxygen level by sense alone. Use proper testing equipment. Follow the proper procedure. Retest as necessary.

REGULATIONS

APPLICABLE PRODUCTS

29 CFR 1910.120(J)(viii) where major spills may occur, a spill containment program, which is part of the employer's safety and health program required in paragraph (b) of this section, shall be implemented to contain and isolate the entire volume of the hazardous substance being transferred.

SORBENTS, SPILL KITS

29 CFR 1910.22(A)(2) floors in your workplace should be "...Maintained in a clean and, so far as possible, a dry condition."

SORBENTS, SPILL KITS

29 CFR 1910.107(B)(3) if floors in a spray booth or work area are combustible, they "...Shall be covered with non-combustible material of such character as to facilitate the safe cleaning and removal of residues."

SORBENTS, SPILL KITS

29 CFR 1910.120(J)(1)(vii) U.S. Department of transportation specified salvage drums or containers and suitable quantities of proper absorbent shall be kept available and used in areas where spills, leaks, or ruptures may occur.

SPILL KITS

40 CFR 112.7(C)(1)(vii) facilities that have the potential to pollute waterways must have "...Appropriate containment and/or diversionary structures or equipment to prevent discharge oil from reaching a navigable water course."

**OIL-ONLY SORBENTS,
OIL-ONLY BOOMS**

40 CFR 112.7(C)(1)(iv) booms and other barriers are considered an "...Appropriate containment and/or diversionary structures or equipment to prevent a discharge."

**OIL-ONLY SORBENTS,
OIL-ONLY BOOMS**

40 CFR 263.30(A) in the event of a spill, transporters must "...Take appropriate immediate action to protect human health and the environment."

**GRAB & GO
VEHICLE SPILL KITS**

40 CFR 263.31 Summary transporters must clean up any hazardous waste discharge that occurs during transportation...so that the hazardous waste discharge no longer presents a hazard to human health or the environment.

**GRAB & GO
VEHICLE SPILL KITS**

29 CFR 1910.107(G)(2) OSHA requires all spraying areas to be "...Kept as free from the accumulation of deposits of combustible residues as practical."

SORBENT PADS & ROLLS

OSHA 1910.120(Q)(3)(ii) the individual in charge of the ICS (incident control system) shall identify, to the extent possible, all hazardous substances or conditions present and shall address as appropriate site analysis, use of engineering controls, maximum exposure limits, hazardous substance handling procedures, and use of any new technologies.

**CHEMICAL &
WASTEWATER CLASSIFIERS**

1910.178(G)(2) states that facilities using batteries containing electrolyte/battery acid must provide a contingency plan in case a spill occurs.

BATTERY ACID SPILL KITS

1910.1048(J)(2) "in work areas where spillage may occur, the employer shall make provision to contain the spill, to decontaminate the work area, and to dispose of the waste."

**FORMALDEHYDE
SPILL CONTROL**

1910.1048(J)(3) "the employer shall assure that all leaks are repaired and spills are cleaned properly by the employers wearing suitable protective equipment and trained in proper methods for cleanup and decontamination."

**FORMALDEHYDE
SPILL CONTROL**

Mercury spill control OSHA hospital recommendations: "...Use mercury spill kits to help clean up small spills of 25 ml or less. Kits should contain gloves, protective glasses, hg absorb powder, mercury sponges, and a disposal bag."

**MERCURY SPILL
CONTROL PRODUCTS**

1910.120 1910.120 (K)(2)(i) a decontamination procedure shall be developed, communicated to employees and implemented before any employees or equipment may enter areas on site where potential for exposure to hazardous substances exists.

**DECONTAMINATION

TRAFFIC SAFETY– WARNING PANELS

Detectable Warning Panels

- ADAAG compliant
- Approved by DOT's
- 5 year manufactures warranty
- Extremely durable
- Easy to install

Cast in Place

Radius Cast in Place

Surface Mount

Wet Set Basics

Pour concrete, contractor establishes finished grade.
Place the polymer concrete panel on top and tap in place.
Final panel elevation needs to be verified.
Make sure proper slope is obtained as specified in the contract document.

Surface Mount Basics

Installation area needs to be dry.
Concrete should be cured for a min of 21 days.
Area and back of panel must be clean.
Apply uniform bead of adhesive to scratched rib areas, and to all four edges to properly seal panel perimeter.
Place panel at desired location and apply pressure.
Clean away excess adhesive.

Available Sizes

Terms and Conditions of Application for Credit

1. Applicant hereby certifies all above statements are true and correct and authorizes Arrow Tools to contact all credit references.
2. All invoices are to be paid within 30 days. All overdue invoices will be subject to a service charge of 1 1/2% per month, which the applicant agrees to pay.
3. Applicant will notify Arrow Tools of any changes in ownership of above company immediately.
4. Applicant agrees remittance shall not be delayed or withheld because of unsettled claims or other disputes, which shall be handled separately from the account for transportation and related charges.
5. Applicant agrees account will be placed on COD if invoices are not paid within Net 30 terms. Applicant also agrees to supply Arrow Tools with Prelim information within 5 days of request and Arrow Tools shall have lien rights on jobs in an attempt to collect on past due invoices.
6. In the event Arrow Tools deems it necessary to utilize the service of an outside collection agency or an attorney to collect on any outstanding debts, the applicant agrees to pay all collection cost, attorney fees and court costs.
7. The undersigned agrees to indemnify and hold harmless Arrow Tools from and against any and all demands, liabilities, costs, penalties, obligations, damages, and expenses or any nature arising due to products sold or supplied and further understands Arrow Tools is not responsible for the use or misuse of any materials, products, goods, tools and equipment sold.

Personal Guarantee

In consideration for the extension of credit and the sale and/or rental of equipment, machinery tools and/or hardware to the forenamed firm, I/we individually and jointly agree guarantee payment of all obligations due and owing by said firm and individual to you. Any liability of the undersigned shall not be affected by any compromise settlement or any variation of terms of any sales or rental contract made by the purchaser. The undersigned waives notice of acceptance, notices of non-payment, and non-performance and notices of any other kind and nature, and waives the right to remove any action brought upon the guarantee from the court originally acquiring jurisdiction. Title and right of immediate possession of the above described property remains with the seller until full and complete payment of the amount has been made. Invoice payable upon presentation. Accounts more than 30 days past due bear interest at legal rate. Should it be necessary to take legal action to enforce any obligations herein, purchaser agrees to pay all attorney and court fees.
